Noise Barrier Products

## Reducing A/C Noise in Buildings

# NuWrap 5

### Other Products from NuWave :-

- Flexible Fabric Backed Noise Barrier Membranes-
- NuWave "Base" embossed
- NuWave "4Zero" foiled.
- NuWave "Impact" foam.
- NuWave Engine Insulation
- NuWave Damping Compounds
- Thermotec Pipe Insulation
- NuWave Floor Underlay

### The Problem- Noise from A/C fan coil and compressor units is disturbing

Fan Coil units and other ventilation components can generate noise levels that are unacceptable in many home and work environments, creating a distraction and adding to stress levels.

### The Solution- NuWrap 5™ Acoustic Lagging for Ductwork.

Easy to cut and install, NuWrap5 combines industrial grade loaded polymer barrier with soft acoustic absorption foam to minimise noise breakout from ventilation equipment.

Applied externally to the equipment casing or laid on the ceiling below a suspended unit, NuWrap 5 forms the core of a quick and inexpensive system that really works.

*NuWrap 5 used to quieten fan coil units in a warehouse to office conversion in Sydney.*

### NuWrap 5 Specifications:

*Sound rating :*

**STC/Rw 26** single wrap over Duct.

*Fire rating:*

AS 1530.3 fire tested (4Zero rated)

*Roll sizes:*

3 mtr x 1350mm wide.

*Accessories:*

Fit using insulation pins with perforated base plates and washers.

Reinforced aluminium foil tape used to seal edges and joins.
